Cyclovac—Low Voltage Air hose (on/off switch)

Hose for central vacuum with 24 V on/off interrupter, integrated on handle, which allows you to start and stop your central cleaning system as you wish. Manufactured in Canada, this high quality hose can be easily handled, for it has a 360° swivel which prevents it from twisting. It also features a slender and soft ergonomic handle for a comfortable, non-slip grip. The airflow control allows you to manually increase or reduce airflow and the button lock keeps attachments from sliding off and makes them easy to change. 5 year warranty

Cyclovac—Low Voltage DataSync Air hose

Hose for central vacuum with 24 V [DataSync](#) technology which allows the selection of 4 power levels. Manufactured in Canada, this high quality hose can be easily handled, for it has a 360° swivel which prevents it from twisting. It also features a slender and soft ergonomic handle for a comfortable, non-slip grip. The airflow control allows you to manually increase or reduce airflow and the button lock keeps attachments from sliding off and makes them easy to change. 5 year warranty

The airflow control allows you to manually increase or reduce airflow and the button lock keeps attachments from sliding off and makes them easy to change. 5 year warranty

Extension Hose for 24V hose (15 or 18 feet options)

This extension for 24 V hoses is the perfect solution to reach the corners that your current hose cannot reach. Just add it onto your hose when you need extra length and store it away for the rest of the time. Ideal for homes with limited inlets.
